ABOUT

Creative and detail-oriented web designer with a passion for crafting visually appealing and user-friendly websites. Skilled in modern design tools and responsive layouts to enhance user experience.

WORK EXPERIENCE

- Video editing

Administration skills
UK base Ministry
in UK Zone 4

- A website developer's experience is built on designing, developing, and maintaining websites using various technologies like HTML, CSS, JavaScript, and frameworks such as React, Next.js, or Angular. Experienced developers understand front-end and back-end development, ensuring websites are responsive, fast, and user-friendly. They work with databases, APIs, and version control systems like GitHub to streamline development.
